

Pagei Hebe

Pagei Hebe *Hebe pinguifolia 'Pagei'*

Height: 12 inches

Spread: 30 inches

Sunlight:

Hardiness Zone: 8a

Other Names: Hebe pageana, Shrubby Veronica, Figwort

Description:

Low growing and hardy with interesting gray green foliage that is concave and oval; the regal white flowers are long blooming; perfect for adding interest to a shrub border and is also a great container plant

Ornamental Features

Pagei Hebe has masses of beautiful corymbs of white flowers rising above the foliage from late spring to early summer, which are most effective when planted in groupings. It has attractive grayish green evergreen foliage. The recurved oval leaves are highly ornamental and remain grayish green throughout the winter. The tan stems can be quite attractive.

Landscape Attributes

Pagei Hebe is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Pagei Hebe is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Pagei Hebe will grow to be about 10 inches tall at maturity, with a spread of 30 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

Pagei Hebe

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Pagei Hebe makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
