- Accent
- Vertical Accent
- Mass Planting
- Hedges/Screening

Planting & Growing

Clump Bamboo will grow to be about 15 feet tall at maturity, with a spread of 12 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.
