

Party Lights False Holly

Party Lights™ False Holly

Osmanthus heterophyllus 'sPg-3-021'

Height: 5 feet

Spread: 3 feet

Sunlight: ○ ●

Hardiness Zone: 7a

Other Names: Tea Olive, Olive Holly, Holly-Leaf Osmanthus

Description:

This compact cultivar is similar in looks to holly, but it's actually related to lilac and privet; bright pink and white new foliage matures to olive green; flowers may not be showy but are extremely fragrant, blooming in fall; more adaptable than holly

Ornamental Features

Party Lights False Holly's attractive spiny pointy leaves emerge pink in spring, turning dark green in colour with pointy light green spines the rest of the year on a plant with an oval habit of growth. It features subtle fragrant white flowers along the branches in mid fall. The burgundy stems are very colorful and add to the overall interest of the plant.

Landscape Attributes

Party Lights False Holly is a dense multi-stemmed evergreen perennial with a shapely oval form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cut back to the ground in late winter before active growth resumes. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Party Lights False Holly is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- Topiary

Party Lights False Holly

Planting & Growing

Party Lights False Holly will grow to be about 5 feet tall at maturity, with a spread of 3 feet. Although it is technically a woody plant, this slow-growing plant can be expected to behave as a perennial in our climate if planted outdoors over the winter, usually regrowing from its base (crown) the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
