Description:

Mounds of narrow, dark-green, grassy foliage; bell-shaped, mauve-lavender flowers in summer; striking when massed along borders; not actually a grass but more closely related to lilies

Ornamental Features

Tuff Tuft Lavender Mondo Grass features dainty spikes of lavender bell-shaped flowers rising above the foliage from early to mid summer. Its attractive grassy leaves remain dark green in colour throughout the year. It produces sky blue berries from early to mid fall.

Landscape Attributes

Tuff Tuft Lavender Mondo Grass is a dense herbaceous evergreen perennial grass with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Tuff Tuft Lavender Mondo Grass is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Tuff Tuft Lavender Mondo Grass will grow to be about 8 inches tall at maturity, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

Tuff Tuft Lavender Mondo Grass

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Tuff Tuft Lavender Mondo Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
