

Sweet Dreams Catmint

Sweet Dreams Catmint

Nepeta subsessilis 'Sweet Dreams'

Height: 22 inches

Spread: 24 inches

Sunlight: ○ ●

Hardiness Zone: 3a

Description:

Distinguished by eye catching bracts of lovely lavender-pink flowers rising up above soft green foliage; for best results, deadhead after blooms are spent; very beautiful massed as a border

Ornamental Features

Sweet Dreams Catmint has masses of beautiful spikes of lightly-scented lavender trumpet-shaped flowers rising above the foliage from early to mid summer, which emerge from distinctive pink flower buds, and which are most effective when planted in groupings. Its attractive small fragrant pointy leaves remain dark green in colour throughout the season.

Landscape Attributes

Sweet Dreams Catmint is a dense herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Sweet Dreams Catmint is recommended for the following landscape applications;

- General Garden Use
- Herb Gardens
- Container Planting

Planting & Growing

Sweet Dreams Catmint will grow to be about 18 inches tall at maturity, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sweet Dreams Catmint is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
