

Wisley Dwarf Aucuba

Wisley Dwarf Aucuba *Aucuba japonica* 'Wisley Nana'

Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 7b

Description:

This stunning dwarf evergreen is compact and dense, the perfect accent in the shaded garden; the toothed glossy foliage has greenish-yellow tips; drought tolerant once established; protect from cold winter winds

Ornamental Features

Wisley Dwarf Aucuba is primarily grown for its highly ornamental fruit. It features an abundance of magnificent red berries from mid fall to late winter. It has attractive chartreuse-tipped dark green foliage. The small glossy pointy leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Wisley Dwarf Aucuba is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Wisley Dwarf Aucuba is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Wisley Dwarf Aucuba will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It has a low canopy. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
