

**Hot And Spicy Oregano**  
*Origanum 'Hot And Spicy'*

Height: 24 inches  
Spread: 18 inches  
Spacing: 18 inches  
Sunlight: ☉ ●  
Hardiness Zone: 4a

**Description:**

This variety is noted for its intense, spicy flavour and aroma; does well in sandy loam, good heat and drought tolerance; a spicy addition to the herb garden, and is also attractive in containers

**Edible Qualities**

Hot And Spicy Oregano is a perennial herb that is commonly grown for its edible qualities, although it does have ornamental merits as well. The fragrant round grayish green leaves which emerge chartreuse in spring are usually harvested from early to late summer. The leaves have a spicy taste.

The leaves are most often used in the following ways:

- Cooking
- Seasoning

**Features & Attributes**

Hot And Spicy Oregano features tiny pink trumpet-shaped flowers in mid summer. Its small fragrant round leaves emerge chartreuse in spring, turning grayish green in color the rest of the year.

This is an herbaceous evergreen perennial herb with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect. This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Aside from its primary use as an edible, Hot And Spicy Oregano is suitable for the following landscape applications;

- Border Edging
- General Garden Use
- Groundcover
- Herb Gardens
- Container Planting

### **Planting & Growing**

Hot And Spicy Oregano will grow to be about 24 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant can be integrated into a landscape or flower garden by creative gardeners, but is usually grown in a designated herb garden. It does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Hot And Spicy Oregano is a good choice for the edible garden, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
