

**Little Bunny Dwarf Fountain Grass**  
*Pennisetum alopecuroides 'Little Bunny'*

Plant Height: 15 inches

Flower Height: 20 inches

Spread: 24 inches

Sunlight: ☉

Hardiness Zone: 5a

Group/Class: Proven Winners

**Description:**

A fine textured dwarf fountain grass suitable for smaller areas; bright green foliage changes to a golden tan in fall; blooms are large bottle brush like cream plumes that persist until winter; beautiful as an accent or massed in borders or rock garden

**Ornamental Features**

Little Bunny Dwarf Fountain Grass has masses of beautiful plumes of creamy white flowers rising above the foliage in mid summer, which are most effective when planted in groupings. Its grassy leaves are green in color. As an added bonus, the foliage turns a gorgeous coppery-bronze in the fall.

**Landscape Attributes**

Little Bunny Dwarf Fountain Grass is an herbaceous perennial grass with a shapely form and gracefully arching stems. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Little Bunny Dwarf Fountain Grass is recommended for the following landscape applications;

- Accent
- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

### Planting & Growing

Little Bunny Dwarf Fountain Grass will grow to be about 15 inches tall at maturity extending to 20 inches tall with the flowers, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Little Bunny Dwarf Fountain Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

Sizes Available:

#1/8" CONT \$15.99
