

Fairy Lights Fuchsia
Fuchsia 'Fairy Lights'

Height: 12 inches

Spread: 18 inches

Sunlight:

Hardiness Zone: 8b

Description:

A striking, compact fuchsia variety featuring nodding flowers of deep rose-purple and shell pink against the green foliage; very attractive to hummingbirds; a dense self supporting round shrub that is perfect for the garden or containers

Ornamental Features

Fairy Lights Fuchsia features dainty nodding rose bell-shaped flowers with purple overtones, white eyes and shell pink calyces along the branches from early summer to mid fall. It has attractive dark green deciduous foliage. The serrated pointy leaves are highly ornamental but do not develop any appreciable fall color.

Landscape Attributes

Fairy Lights Fuchsia is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard.

Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Fairy Lights Fuchsia is recommended for the following landscape applications;

- Accent
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Fairy Lights Fuchsia will grow to be about 12 inches tall at maturity, with a spread of 18 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant will benefit from an application of bonemeal and/or mycorrhizal fertilizer at the time of planting. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Fairy Lights Fuchsia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
