

**Eleanor Roosevelt Variegated
Croton**

Codiaeum variegatum 'Eleanor Roosevelt'

Height: 6 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: (annual)

Other Names: Sloppy Painter Croton, Variegated Laurel

Description:

This woody perennial is considered a houseplant in colder climates, and noted for its striking foliage; glossy, narrow leaves of deep green, splashed and speckled with bright yellow; a striking garden accent; great for patio pots; protect from frost

Ornamental Features

Eleanor Roosevelt Variegated Croton's attractive small glossy narrow leaves emerge light green in spring, turning dark green in color with distinctive yellow spots the rest of the year on a plant with an upright spreading habit of growth.

Landscape Attributes

Eleanor Roosevelt Variegated Croton is a dense herbaceous annual with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Eleanor Roosevelt Variegated Croton is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Eleanor Roosevelt Variegated Croton will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It has a low canopy with a typical clearance of 1 foot from the ground. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant is a heavy feeder that requires frequent fertilizing throughout the growing season to perform at its best. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Eleanor Roosevelt Variegated Croton is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
