

Fairchild Red Hawaiian Ti Plant
Cordyline fruticosa 'Fairchild Red'

Height: 24 inches

Spread: 18 inches

Sunlight:

Hardiness Zone: 10a

Other Names: Good Luck Plant

Description:

A dwarf variety featuring narrow gray-green leaves with vibrant pink edges; spectacular when massed along borders; perfect for adding a lush, tropical look to patio areas and containers; prefers dappled shade, but is able to handle full sun

Ornamental Features

Fairchild Red Hawaiian Ti Plant is primarily valued in the garden for its ornamental upright and spreading habit of growth. It has attractive grayish green foliage edged in hot pink with hints of red. The glossy narrow leaves are highly ornamental and remain grayish green throughout the winter.

Landscape Attributes

Fairchild Red Hawaiian Ti Plant is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should never be pruned except to remove any dieback, as it tends not to take pruning well. It has no significant negative characteristics.

Fairchild Red Hawaiian Ti Plant is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- Container Planting

Planting & Growing

Fairchild Red Hawaiian Ti Plant will grow to be about 24 inches tall at maturity, with a spread of 18 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Fairchild Red Hawaiian Ti Plant makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
