

Layla™ Blue Lavender
Lavandula angustifolia 'Layla Blue'

Height: 14 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight:

Hardiness Zone: 5a

Other Names: English Lavender, Common Lavender

Group/Class: Layla Series

Description:

A compact, upright, well branched variety presenting volumes of violet-blue blooms in summer to fall; an excellent choice for low, informal hedging or for use in border fronts; plant near doors and walkways where the lovely scent can be appreciated

Ornamental Features

Layla Blue Lavender has masses of beautiful spikes of fragrant lavender flowers with blue overtones rising above the foliage from early summer to early fall, which are most effective when planted in groupings. The flowers are excellent for cutting. It has attractive green evergreen foliage. The fragrant narrow leaves are highly ornamental and remain green throughout the winter.

Landscape Attributes

Layla Blue Lavender is a dense multi-stemmed evergreen shrub with a mounded form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and can be pruned at anytime. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Layla Blue Lavender is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Layla Blue Lavender will grow to be about 12 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type, but has a definite preference for alkaline soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Layla Blue Lavender makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
