

**Island Dancer Rose**  
*Rosa 'Island Dancer'*

Height: 3 feet

Spread: 3 feet

Sunlight: ☉

Hardiness Zone: 4a

Group/Class: Easy Elegance Rose

**Description:**

With its ruffled deep pink bicoloured petals and white reverses, this rose definitely has a tropical feel; disease resistant foliage is the backdrop for large and recurrent blooms to grace any garden

**Ornamental Features**

Island Dancer Rose features showy lightly-scented hot pink flowers with a white reverse at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

**Landscape Attributes**

Island Dancer Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Island Dancer Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Island Dancer Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
