

Rosy Wings Rose
Rosa 'Rosy Wings'

Height: 6 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 4b

Group/Class: Shrub Rose

Description:

This stunning variety has unique velvety scarlet blooms bursting forth throughout the summer above deep green glossy foliage that is disease resistant and the perfect contrasting backdrop for the blooms; perfect massed along borders or as an accent

Ornamental Features

Rosy Wings Rose features showy lightly-scented scarlet flowers with gold eyes along the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Rosy Wings Rose is a multi-stemmed deciduous shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rosy Wings Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Rosy Wings Rose will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
