

**Shishiba Hydrangea**  
*Hydrangea 'Shishiba'*

Height: 5 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 5b

Other Names: *Hydrangea macrophylla* var. *serrata*

**Description:**

A beautiful compact shrub that features showy lacecaps blooms of white sepals surrounding light blue fertile flowers in the center; serrated leaves are tinged burgundy in the fall; a wonderful choice for the flower garden or border

**Ornamental Features**

Shishiba Hydrangea features bold white lacecap flowers with blue overtones at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The serrated pointy leaves do not develop any appreciable fall color.

**Landscape Attributes**

Shishiba Hydrangea is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Shishiba Hydrangea is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

**Planting & Growing**

Shishiba Hydrangea will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.
