Description:

A compact variety producing small peach trumpets with yellow throats and red flares reaching out to nicely ruffled edges; great grassy texture and form; diploid; a perfect addition to a smaller garden or border space

Ornamental Features

Little Anna Rosa Daylily features bold fragrant peach trumpet-shaped flowers with yellow throats and a red flare at the ends of the stems in early summer. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the year.

Landscape Attributes

Little Anna Rosa Daylily is an herbaceous evergreen perennial with a shapely form and gracefully arching foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Little Anna Rosa Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

Little Anna Rosa Daylily will grow to be about 10 inches tall at maturity extending to 14 inches tall with the flowers, with a spread of 10 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
