

**Gift Of Life Rose**  
*Rosa 'Gift Of Life'*

Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 6b

Group/Class: Hybrid Tea Rose

**Description:**

A highly desirable soft golden yellow variety that is lightly tinged in pale pink; named to promote the need for organ donation awareness; blooms are large with a moderate fragrance, on long straight stems; a perfect garden accent rose

**Ornamental Features**

Gift Of Life Rose features showy clusters of fragrant yellow flowers with shell pink overtones and gold centers at the ends of the branches from mid spring to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Gift Of Life Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Gift Of Life Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Gift Of Life Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
