

## **Aurea Wells Deodar Cedar**

*Cedrus deodara 'Aurea Wells'*

Height: 30 feet

Spread: 20 feet

Sunlight:

Hardiness Zone: 5b

Other Names: Wells Golden Deodar Cedar, Himalayan Cedar

### **Description:**

A striking medium sized tree with a pyramidal habit of growth, horizontal branches bear golden new foliage that matures to blue-green; best used as a colorful landscape accent; rich color year round for added winter interest

### **Ornamental Features**

Aurea Wells Deodar Cedar is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has attractive bluish-green evergreen foliage which emerges gold in spring. The needles are highly ornamental and remain bluish-green throughout the winter.

### **Landscape Attributes**

Aurea Wells Deodar Cedar is an evergreen tree with a strong central leader and a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Aurea Wells Deodar Cedar is recommended for the following landscape applications;

- Accent
- Vertical Accent

### **Planting & Growing**

Aurea Wells Deodar Cedar will grow to be about 30 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
