Mr. Goldstrike Aucuba *Aucuba japonica* 'Mr. Goldstrike'

Height: 6 feet

Spread: 5 feet

Sunlight: ● ●

Hardiness Zone: 7a

Description:

A perfect solution for bold color in the most shaded garden areas; perfect for containers; ideal as a dense screen; drought tolerant once established; protect from cold winter winds

Ornamental Features

Mr. Goldstrike Aucuba has attractive yellow-spotted dark green foliage on a plant with a round habit of growth. The glossy pointy leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Mr. Goldstrike Aucuba is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Mr. Goldstrike Aucuba is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Mr. Goldstrike Aucuba will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
