Nelson Wood Sorrel

Nelson Wood Sorrel

Oxalis magellanica 'Nelson'

Height: 2 inches

Spread: 16 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: (annual)

Ornamental Features

Nelson Wood Sorrel features dainty white tubular flowers at the ends of the stems from late spring to mid summer. Its tiny compound leaves remain forest green in colour throughout the year.

Landscape Attributes

Nelson Wood Sorrel is a dense herbaceous annual with a ground-hugging habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Nelson Wood Sorrel is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Groundcover

Planting & Growing

Nelson Wood Sorrel will grow to be only 2 inches tall at maturity, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
