Ruby Anniversary Abelia

Ruby Anniversary™ Abelia

Abelia chinensis 'Keiser'

Height: 6 feet

Spread: 5 feet

Spacing: 6 feet

Sunlight:

Hardiness Zone: 7a

Description:

This attractive shrub has red tinged emerging foliage that matures to green, then red in fall; a mounded habit and trumpet shaped white flowers all summer, make it the perfect presentation for a smaller area

Ornamental Features

Ruby Anniversary Abelia features dainty clusters of fragrant white trumpet-shaped flowers at the ends of the branches from mid summer to early fall. It has attractive dark green evergreen foliage which emerges red in spring. The glossy oval leaves are highly ornamental and turn an outstanding red in the fall, which persists throughout the winter.

Landscape Attributes

Ruby Anniversary Abelia is a multi-stemmed evergreen shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Ruby Anniversary Abelia is recommended for the following landscape applications;

Planting & Growing

Ruby Anniversary Abelia will grow to be about 6 feet tall at maturity, with a spread of 5 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 6 feet apart. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Ruby Anniversary Abelia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
