Chaste Tree

Chaste Tree

Vitex negundo

Height: 12 feet

Spread: 10 feet

Sunlight: ☉

Hardiness Zone: 7a

Description:

An open growing shrub which features lavender flower spikes in summer when few other shrubs bloom, delicate texture in summer; can be treated like a perennial and cut back each spring, as it flowers on new wood and regrows vigorously

Ornamental Features

Chaste Tree has panicles of lilac purple flowers rising above the foliage from mid to late summer. Its palmate leaves remain grayish green in colour throughout the season.

Landscape Attributes

Chaste Tree is an open multi-stemmed perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cut back to the ground in late winter before active growth resumes. It has no significant negative characteristics.

Chaste Tree is recommended for the following landscape applications;

- Hedges/Screening
- General Garden Use

Planting & Growing

Chaste Tree will grow to be about 12 feet tall at maturity, with a spread of 10 feet. It tends to be leggy, with a typical clearance of 2 feet from the ground, and should be underplanted with lower-growing perennials. Although it is technically a woody plant, this fast-growing plant can be expected to behave as a perennial in our climate if planted outdoors over the winter, usually regrowing from its base (crown) the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This species is not originally from North America.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
