Hatsuyuki Asian Jasmine

Hatsuyuki Asian Jasmine

Trachelospermum asiaticum 'Hatsuyuki'

Plant Height: 4 inches

Flower Height: 6 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ● ●

Hardiness Zone: (annual)

Description:

An interesting climbing groundcover with pink emerging leaves that become dark glossy green with white variegation; white flowers compliment the nice foliage in late spring; great for lightly shaded woodland areas

Ornamental Features

Hatsuyuki Asian Jasmine features showy fragrant white flowers at the ends of the stems from mid spring to early summer. Its attractive glossy oval leaves emerge pink in spring, turning dark green in colour with showy white variegation and tinges of grayish green the rest of the year.

Landscape Attributes

Hatsuyuki Asian Jasmine is an herbaceous annual with a ground-hugging habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Hatsuyuki Asian Jasmine is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Hatsuyuki Asian Jasmine will grow to be only 4 inches tall at maturity extending to 6 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Hatsuyuki Asian Jasmine is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
