Gold Rush Oriental Paper Bush *Edgeworthia chrysantha* 'Gold Rush'

Height: 5 feet

Spread: 7 feet

Sunlight: ○ ●

Hardiness Zone: 8a

Other Names: Mitsumata Paper Plant

Description:

The foliage on this variety is attractive, but it is primarily grown for its flowers; blooms are fragrant and open in late winter; golden-yellow and white trumpets that are almost tubular, in dense clusters create an exotic look as a garden accent

Ornamental Features

Gold Rush Oriental Paper Bush has masses of beautiful clusters of fragrant white trumpet-shaped flowers with yellow overtones and gold throats at the ends of the branches from mid to late winter before the leaves, which are most effective when planted in groupings. It has attractive dark green deciduous foliage. The small narrow leaves are highly ornamental but do not develop any appreciable fall colour. The brown bark and brick red branches add an interesting dimension to the landscape.

Landscape Attributes

Gold Rush Oriental Paper Bush is a multi-stemmed deciduous shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering

Gold Rush Oriental Paper Bush is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Gold Rush Oriental Paper Bush will grow to be about 5 feet tall at maturity, with a spread of 7 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Gold Rush Oriental Paper Bush makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
