# Wolfpack Red Azalea Rhododendron 'Wolfpack Red'

Height: 3 feet Spread: 4 feet

Sunlight: 

Hardiness Zone: 7a

Group/Class: Carla Hybrids

Description:

A stunning broadleaf evergreen azalea with hot red flowers in spring and a low, spreading habit; best with some shelter; great as a foundation; absolutely must have well-drained, highly acidic and organic soil, use plenty of peat moss when planting

Wolfpack Red Azalea is clothed in stunning clusters of lightly-scented cherry red trumpet-shaped flowers at the ends of the branches in mid spring. It has dark green evergreen foliage. The narrow leaves turn an outstanding coppery-bronze in the fall, which persists throughout the winter.

#### **Landscape Attributes**

Wolfpack Red Azalea is a multi-stemmed evergreen shrub with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Wolfpack Red Azalea is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

#### **Planting & Growing**

Wolfpack Red Azalea will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
