Description:

This shade loving dwarf tree fern produces long green fronds that arch gracefully from its short trunk, that forms over time; perfect for shaded areas of the garden or containers; never allow to dry out completely, but be careful not to overwater

Ornamental Features

Silver Lady Fern's glossy ferny bipinnately compound leaves remain green in colour throughout the year on a plant with an upright spreading habit of growth.

Landscape Attributes

Silver Lady Fern is an herbaceous evergreen perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

Silver Lady Fern is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Silver Lady Fern will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It has a low canopy with a typical clearance of 2 feet from the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Silver Lady Fern is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
