### Sparkling Sangria™ Chinese Fringeflower

*Loropetalum chinense 'PILC-II'*

Height: 10 feet

Spread: 10 feet

Sunlight: ☉ ●

Hardiness Zone: 8a

Other Names: Chinese Fringe Flower, Chinese Witch Hazel

#### Description:

This selection forms a large shrub with electric pink, strap-like flowers covering the plant in spring; pinkish-purple new foliage that matures to burgundy adds great texture and contrast; an easy to grow and well-behaved shrub for general garden use

#### Ornamental Features

Sparkling Sangria Chinese Fringeflower is draped in stunning fragrant hot pink strap-like flowers with red overtones along the branches from early to mid spring. Its attractive oval leaves emerge fuchsia in spring, turning burgundy in colour with hints of olive green the rest of the year.

#### Landscape Attributes

Sparkling Sangria Chinese Fringeflower is a multi-stemmed evergreen perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

### Planting & Growing

Sparkling Sangria Chinese Fringeflower will grow to be about 10 feet tall at maturity, with a spread of 10 feet. Although it is technically a woody plant, this fast-growing plant can be expected to behave as a perennial in our climate if planted outdoors over the winter, usually regrowing from its base (crown) the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
