### Traversii New Zealand Myrtle

*Lophomyrtus x ralphii* 'Traversii'

Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 8b

Other Names: *Lophomyrtus bullata* x *obcordata*

#### Description:

A small, evergreen, upright, branching shrub featuring tiny, rounded leaves variegated in light green and pale yellow; small white flowers in summer are followed by black berries; provide semi-shade in very hot summer climates

#### Ornamental Features

Traversii New Zealand Myrtle has attractive buttery yellow-variegated light green foliage with hints of chartreuse on a plant with an upright spreading habit of growth. The tiny glossy round leaves are highly ornamental and remain light green throughout the winter. It features subtle clusters of white flowers at the ends of the branches in mid summer. It produces black berries from late summer to late fall. The brick red branches are extremely showy and add significant winter interest.

#### Landscape Attributes

Traversii New Zealand Myrtle is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Traversii New Zealand Myrtle is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

### Planting & Growing

Traversii New Zealand Myrtle will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Traversii New Zealand Myrtle makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
