Pink Passion Cabbage Palm

Cordyline australis 'Seipin'

Height: 6 feet

Spread: 4 feet

Sunlight: ☉ ●

Hardiness Zone: (annual)

Other Names: Cabbage Tree, Grass Palm, Giant Dracaena

Description:

Stunning, narrow, upright leaves with bold pink margins and dark gray-purple center stripes; spectacular when massed on the landscape, and ideal for adding a lush, tropical look to the garden or containers; will branch over time

Ornamental Features

Pink Passion Cabbage Palm features showy panicles of fragrant white flowers from late spring to early summer. Its attractive sword-like leaves remain deep purple in colour with distinctive hot pink edges and tinges of gray throughout the year.

Landscape Attributes

Pink Passion Cabbage Palm is an open multi-stemmed annual with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and should never be pruned except to remove any dieback, as it tends not to take pruning well. It has no significant negative characteristics.

Pink Passion Cabbage Palm is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Pink Passion Cabbage Palm will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It has a low canopy with a typical clearance of 1 foot from the ground. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Pink Passion Cabbage Palm is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
