# Kabitan Hosta Hosta sieboldiana 'Kabitan'

Plant Height: 8 inches
Flower Height: 12 inches

Spread: 12 inches
Spacing: 10 inches
Sunlight: 

◆
Hardiness Zone: 2b

Other Names: Funkia, Plantain Lily

#### **Description:**

A wonderful smaller variety that features narrow and wavy golden leaves with dark green margins; a perfect addition to shaded borders and beds; lavender-violet colored blooms rise above during the mid summer months; low maintenance and easy to grow

#### **Ornamental Features**

Kabitan Hosta features dainty spikes of lavender tubular flowers rising above the foliage from mid to late summer. Its attractive small textured narrow leaves remain gold in colour with distinctive green edges throughout the season.

#### **Landscape Attributes**

Kabitan Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

### **Planting & Growing**

Kabitan Hosta will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
