Height: 10 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 5a

Group/Class: Climbing Rose

Description:

A showy climber that produces spectacular, hot pink and scarlet blooms with silver reverses and a mild fragrance; perfect for garden walls and trellises; prune this variety after blooming; good disease resistance

Ornamental Features

Bajazzo Arborose Rose features showy lightly-scented semi-double hot pink flowers with scarlet overtones, yellow eyes and a silver reverse along the branches from late spring to late summer. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

Bajazzo Arborose Rose is a multi-stemmed deciduous woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This woody vine will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting bees and butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Bajazzo Arborose Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Bajazzo Arborose Rose

Planting & Growing

Bajazzo Arborose Rose will grow to be about 10 feet tall at maturity, with a spread of 3 feet. As a climbing rose, it can be leggy near the base and may be concealed by underplanting with lower-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This woody vine should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
