Height: 25 feet

Spread: 20 feet

Sunlight:

Hardiness Zone: 4a

Other Names: Hybrid Wichurana Rose

Group/Class: Rambler Rose

Description:

This vigorous variety produces cup shaped, clear rose-pink blooms that age to cream; mild fruity fragrance; excellent for arbors, along walls or fences, or as a large free flowing specimen

Ornamental Features

May Queen Rose features showy lightly-scented double rose flowers with pink overtones along the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

May Queen Rose is a multi-stemmed deciduous woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This woody vine will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

May Queen Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

May Queen Rose

Planting & Growing

May Queen Rose will grow to be about 25 feet tall at maturity, with a spread of 20 feet. As a climbing rose, it can be leggy near the base and may be concealed by underplanting with lower-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This woody vine should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
