Height: 12 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: African Marigold, Mexican Marigold

**Description:**

This outstanding compact selection produces huge, dense, yellow flower heads; impressive along borders or in patio containers; long lasting blooms

**Ornamental Features**

Moonstruck Yellow Marigold features bold fully double yellow ball-shaped flowers at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its fragrant ferny leaves remain dark green in colour throughout the season.

**Landscape Attributes**

Moonstruck Yellow Marigold is an herbaceous annual with an upright spreading habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Moonstruck Yellow Marigold is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

## Moonstruck Yellow Marigold

---

**Planting & Growing**

Moonstruck Yellow Marigold will grow to be about 10 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Moonstruck Yellow Marigold is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
