Height: 16 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight: ◐ ●

Hardiness Zone: 3b

Other Names: Siberian Bugloss

Group/Class: Alchemy Series

Description:

Stunning heart shaped leaves are shiny silver with contrasting, thin dark green veins; clusters of tiny blue flowers in spring; a wonderful shade accent plant; best in moist, rich, well drained soil

Ornamental Features

Alchemy Silver Bugloss features airy cymes of sky blue flowers at the ends of the stems from early to mid spring. The flowers are excellent for cutting. Its attractive heart-shaped leaves emerge chartreuse in spring, turning silver in colour with distinctive dark green veins throughout the season.

Landscape Attributes

Alchemy Silver Bugloss is an herbaceous perennial with a mounded form. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Alchemy Silver Bugloss is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Alchemy Silver Bugloss

Planting & Growing

Alchemy Silver Bugloss will grow to be about 14 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Alchemy Silver Bugloss is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
