Success!® HD Rose Star Petunia

Petunia 'Success! HD Rose Star'

Height: 5 inches

Spread: 12 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: (annual)

Group/Class: Success HD Series

Description:

A dense, compact mounded variety that is a perfect addition to borders, hanging baskets and containers; beautiful large, pink trumpeted flowers with a white star are showcased among small green foliage; easy to maintain, deadhead to encourage new growth

Ornamental Features

Success! HD Rose Star Petunia has masses of beautiful rose trumpet-shaped flowers with white stripes at the ends of the stems from mid spring to late summer, which are most effective when planted in groupings. Its pointy leaves remain green in colour throughout the season.

Landscape Attributes

Success! HD Rose Star Petunia is a dense herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Success! HD Rose Star Petunia is recommended for the following landscape applications;

Planting & Growing

Success! HD Rose Star Petunia will grow to be only 5 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Success! HD Rose Star Petunia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
