Plant Height: 8 inches

Flower Height: 12 inches

Spread: 12 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Lily of the Nile, African Lily

Description:

This compact, dwarf selection produces a low mound of luxurious narrow green foliage; elegant, double to semi-double white flowers appear in mid-summer on short, strong stems; a perfect accent planting in the garden or massed along border fronts

Ornamental Features

Double Diamond Agapanthus features showy clusters of white trumpet-shaped flowers rising above the foliage from early to mid summer. The flowers are excellent for cutting. Its grassy leaves remain dark green in colour throughout the year.

Landscape Attributes

Double Diamond Agapanthus is an herbaceous annual with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Double Diamond Agapanthus is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Double Diamond Agapanthus

Planting & Growing

Double Diamond Agapanthus will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Double Diamond Agapanthus is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
