Height: 28 inches

Spread: 24 inches

Sunlight: ○

Hardiness Zone: 6a

Other Names: Summer Lilac

Group/Class: Chrysalis Series

Description:

A compact selection bred for an abundance of vivid pink flowers in summer, over rich green foliage; attracts butterflies; may treat as a perennial and cut it back to the ground each spring as it regrows vigorously and blooms on new wood

Ornamental Features

Chrysalis Pink Butterfly Bush features showy panicles of fragrant pink flowers with orange eyes at the ends of the branches from mid spring to late summer. The flowers are excellent for cutting. Its attractive narrow leaves emerge light green in spring, turning forest green in colour throughout the season.

Landscape Attributes

Chrysalis Pink Butterfly Bush is an open multi-stemmed perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cut back to the ground in late winter before active growth resumes. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Chrysalis Pink Butterfly Bush is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Chrysalis Pink Butterfly Bush

Planting & Growing

Chrysalis Pink Butterfly Bush flowers

Chrysalis Pink Butterfly Bush will grow to be about 28 inches tall at maturity, with a spread of 24 inches. It tends to be leggy, with a typical clearance of 1 foot from the ground, and should be underplanted with lower-growing perennials. Although it is technically a woody plant, this fast-growing plant can be expected to behave as a perennial in our climate if planted outdoors over the winter, usually regrowing from its base (crown) the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Chrysalis Pink Butterfly Bush is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
