Veranda Compact Double Sugar Plum Petunia

Veranda Compact Double Sugar Plum Petunia

Petunia 'Veranda Compact Double Sugar Plum'

Height: 12 inches

Spread: 12 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: (annual)

Group/Class: Veranda Series

Description:

A beautiful early blooming, compact mounded series that features vibrant double blooms sitting above green foliage; an excellent choice for hanging baskets, containers or beds and borders; low maintenance-deadhead to encourage new blooms

Ornamental Features

Veranda Compact Double Sugar Plum Petunia is clothed in stunning double purple round flowers with deep purple veins at the ends of the stems from mid spring to mid fall. Its pointy leaves remain green in colour throughout the season.

Landscape Attributes

Veranda Compact Double Sugar Plum Petunia is a dense herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Veranda Compact Double Sugar Plum Petunia is recommended for the following landscape applications;

Planting & Growing

Veranda Compact Double Sugar Plum Petunia will grow to be about 12 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Veranda Compact Double Sugar Plum Petunia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
