Height: 24 inches

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Garden Mum, Korean Mum, Dendranthemum

Description:

A heat and frost tolerant series that features large, colorful flowers over green mounded plants; a low maintenance selection ideal for containers, beds and borders; adaptable to various conditions; prefers full sun

Ornamental Features

Moonglow Yellow Chrysanthemum is smothered in stunning double yellow daisy flowers at the ends of the stems from late summer to late fall. The flowers are excellent for cutting. Its fragrant ferny leaves remain green in colour throughout the season.

Landscape Attributes

Moonglow Yellow Chrysanthemum is an herbaceous annual with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Moonglow Yellow Chrysanthemum is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Moonglow Yellow Chrysanthemum will grow to be about 24 inches tall at maturity, with a spread of 3 feet. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

Moonglow Yellow Chrysanthemum

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Moonglow Yellow Chrysanthemum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
