Height: 9 inches

Spread: 12 inches

Spacing: 6 inches

Sunlight:

Hardiness Zone: 4a

Other Names: Lawn Daisy

Description:

Large, semi-double red pompoms with golden-yellow centers on short, sturdy stems; this is a biennial, but is sometimes marketed as an annual; prefers cooler summers and cool, moist soil; water regularly but be careful not to over water

Ornamental Features

Galaxy Red English Daisy features delicate double red button flowers with yellow eyes at the ends of the stems from mid spring to early summer. The flowers are excellent for cutting. Its glossy oval leaves remain dark green in colour throughout the season.

Landscape Attributes

Galaxy Red English Daisy is a dense herbaceous biennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a high maintenance plant that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading
- Self-Seeding

Galaxy Red English Daisy is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Galaxy Red English Daisy

Planting & Growing

Galaxy Red English Daisy will grow to be about 7 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 6 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and tends to be biennial, meaning that it puts on vegetative growth the first year, flowers the second, and then dies. However, this species tends to self-seed and will thereby endure for years in the garden if allowed.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant does not require much in the way of fertilizing once established. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Galaxy Red English Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
