Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 6a

Group/Class: Shrub Rose

Description:

A beautiful hardy shrub rose, covered in fragrant, buttery yellow blooms, opening from deep apricot buds; fades to creamy white with age; repeat-blooming; bushy, upright habit, hardy and resistant to disease; all roses need full sun and well-drained soil

Ornamental Features

Danae Rose features bold fragrant fully double buttery yellow flowers at the ends of the branches from late spring to early fall, which emerge from distinctive peach flower buds. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn an outstanding brick red in the fall. The fruits are showy scarlet hips displayed from mid to late fall. The spiny brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Danae Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Danae Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Danae Rose

Planting & Growing

Danae Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
