Height: 6 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 6a

Group/Class: Shrub Rose

Description:

Blooming continuously throughout the season, this large, bushy variety produces ample amounts of single, bright crimson blooms over deep green, glossy foliage; medium musky fragrance; a great choice for garden beds, borders or hedges

Ornamental Features

Red Coat Rose features showy lightly-scented red flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

Red Coat Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Red Coat Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Red Coat Rose

Planting & Growing

Red Coat Rose will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
