Height: 30 inches

Spread: 20 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Description:

Stunning outward facing, bright pink cactus blooms over dark mahogany-black foliage adds a touch intrigue and mystery to garden beds, borders and containers; tidy, compact habit with excellent branching; nectar rich blooms are perfect for pollinators

Ornamental Features

Electro Pink Dahlia features showy fully double hot pink pincushion flowers at the ends of the stems from mid summer to mid fall. The flowers are excellent for cutting. Its pointy leaves remain green in colour throughout the season.

Landscape Attributes

Electro Pink Dahlia is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Electro Pink Dahlia is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Electro Pink Dahlia

Planting & Growing

Electro Pink Dahlia will grow to be about 24 inches tall at maturity, with a spread of 20 inches. The flower stalks can be weak and so it may require staking in exposed sites or excessively rich soils. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant does not require much in the way of fertilizing once established. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Electro Pink Dahlia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
