Plant Height: 4 inches

Flower Height: 6 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: (annual)

Group/Class: Scopia Series

Description:

Dainty pale pink-purple flowers stand out on top of dark green, toothed foliage; a compact-mounded series that performs wonderfully in hanging baskets, patio containers and garden beds; long blooming season, from spring until fall

Ornamental Features

Scopia Gulliver Compact Blush Bacopa is covered in stunning shell pink star-shaped flowers with yellow eyes and lavender centers along the stems from mid spring to late fall. Its small serrated round leaves remain green in colour throughout the season.

Landscape Attributes

Scopia Gulliver Compact Blush Bacopa is an herbaceous annual with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Scopia Gulliver Compact Blush Bacopa is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting
- Hanging Baskets

Scopia Gulliver Compact Blush Bacopa

Planting & Growing

Scopia Gulliver Compact Blush Bacopa will grow to be only 4 inches tall at maturity extending to 6 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Scopia Gulliver Compact Blush Bacopa is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
