Hardiness Zone: 6b

Group/Class: Rambling Rose

Description:

A lovely, nearly thornless rambling rose, presenting orange buds that open to small apricot and yellow blooms that fade to peach pink and cream; sweet, musky fragrance; repeat flowers throughout summer; resistant to disease

Ornamental Features

Ghislaine de Feligonde Rose features showy fragrant double peach flowers with yellow overtones and gold eyes at the ends of the branches from late spring to late summer, which emerge from distinctive orange flower buds. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour. The fruits are showy scarlet hips displayed from mid to late fall.

Landscape Attributes

Ghislaine de Feligonde Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Ghislaine de Feligonde Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Ghislaine de Feligonde Rose

Planting & Growing

Ghislaine de Feligonde Rose will grow to be about 8 feet tall at maturity, with a spread of 8 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
