Height: 12 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ◐ ●

Hardiness Zone: (annual)

Other Names: American Rubber Plant

Description:

A beautiful plant grown primarily for its attractive, spoon shaped, shiny dark green foliage; prefers partial shade, avoid direct afternoon sun; thrives in warm, humid conditions; small compact habit make it ideal for patio containers

Ornamental Features

Green Baby Rubber Plant's attractive small glossy oval leaves remain dark green in colour throughout the year on a plant with an upright spreading habit of growth. The brick red stems are very colorful and add to the overall interest of the plant.

Landscape Attributes

Green Baby Rubber Plant is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Green Baby Rubber Plant is recommended for the following landscape applications;

- Accent
- Mass Planting
- Container Planting

Green Baby Rubber Plant

Planting & Growing

Green Baby Rubber Plant will grow to be about 12 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selection of a native North American species. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Green Baby Rubber Plant is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
