Plant Height: 14 inches

Flower Height: 24 inches

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Pronto's Queen of the Nile Agapanthus

Description:

This variety produces a clumping mound of luxurious strap-like variegated yellow and green foliage; luminous lavender-blue flowers appear in late spring; perfect massed along borders; evergreen only in warmer climates

Ornamental Features

Queen Of The Nile Agapanthus features bold clusters of lavender trumpet-shaped flowers with blue overtones rising above the foliage from late spring to late summer. The flowers are excellent for cutting. Its narrow leaves remain dark green in colour with showy yellow variegation throughout the year.

Landscape Attributes

Queen Of The Nile Agapanthus is an herbaceous annual with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Queen Of The Nile Agapanthus is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Queen Of The Nile Agapanthus

Planting & Growing

Queen Of The Nile Agapanthus will grow to be about 14 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 3 feet. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Queen Of The Nile Agapanthus is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
