Midwest Living Rose

Midwest Living Rose *Rosa 'Midwest Living'*

Height: 3 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 5b

Group/Class: Shrub Rose

Description:

A distinct variety producing flushes of velvety red roses all season long; habit is upright, open and airy with leathery green foliage that has a matte finish; all roses need full sun and well-drained soil

Ornamental Features

Midwest Living Rose is blanketed in stunning red flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

Midwest Living Rose is an open multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Midwest Living Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Midwest Living Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.
