

Cinnamon Flakes Chinese Birch

Cinnamon Flakes Chinese Birch

Betula chinensis 'KLMD'

Height: 30 feet

Spread: 20 feet

Sunlight: ○ ●

Hardiness Zone: 4b

Other Names: Chinese Red Birch

Description:

An often overlooked birch with captivating orange-copper bark that peels in thin sheets; grows quite large with a rounded form, a most attractive shade tree for the landscape

Ornamental Features

Cinnamon Flakes Chinese Birch has light green deciduous foliage on a tree with an upright spreading habit of growth. The pointy leaves turn an outstanding yellow in the fall. The peeling antique red bark is extremely showy and adds significant winter interest.

Landscape Attributes

Cinnamon Flakes Chinese Birch is a deciduous tree with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Cinnamon Flakes Chinese Birch is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Cinnamon Flakes Chinese Birch will grow to be about 30 feet tall at maturity, with a spread of 20 feet. It has a high canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 80 years or more.

Cinnamon Flakes Chinese Birch

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
