Purple Rain Vigorosa Rose

Purple Rain™ Vigorosa® Rose

Rosa 'KORpurlig'

Height: 30 inches

Spread: 30 inches

Sunlight: ☉

Hardiness Zone: 5b

Group/Class: Shrub Rose

Description:

A distinct variety producing flushes of stunning fuchsia blooms that light up the garden; will tirelessly bloom until frost; all roses need full sun and well-drained soil

Ornamental Features

Purple Rain Vigorosa Rose features showy clusters of fragrant fuchsia flowers with gold eyes at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Purple Rain Vigorosa Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees and butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Purple Rain Vigorosa Rose is recommended for the following landscape applications;

- General Garden Use

Planting & Growing

Purple Rain Vigorosa Rose will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
